HANDS-ON EXP

Chakra UI · Material UI · Styled Components · Thirdweb SDK · Moralis Web3 APIs · OpenZeppelin

Music · Gym · Travel · Tennis

ABOUT

I am a full-stack blockchain developer based in India with over two years of experience in React.js/Next.js development.

I specialize in creating responsive user interfaces for web-based applications that prioritize security and user experience.

EXPERIENCE

BlockTrain | Full-Stack Developer   Aug 22 - Nov 22   Preview ⇗

- A comprehensive web platform for learning full-stack blockchain development, including courses and blogs.
- Achieved 125k+ visitors in just 2 months since website launch.
- Designed and developed a full-stack app using **Nextjs** and **Firebase**.

AppSecure Security | Front-End Developer   Jan 22 - Aug 22   *Confidential*

- AppSecure is a service-based startup in Bangalore that offers penetration testing to clients globally.
- Designed and Developed the secure front-end of PentaBug, a bug bounty platform, from scratch using **Nextjs, Reactjs** and **Auth0**.
- Onboarded 200+ hackers and 5 companies to the platform in the first month following its launch.

Beyond Pinks | Full-Stack Developer   Oct 21 - Dec 21   *Expired*

- Designed and developed a mentoring platform for women and LGBT individuals in corporate settings.
- Implemented advanced features including booking slots with mentors, user authentication with JWT, and an admin portal for controlling ads and banners throughout the application.
- Tech. stack - **Nextjs**, **Nodejs**, **Expressjs** and **Mongoosejs**.

PROJECTS

Crowdfunding Dapp | Front-End, Web3   Preview ⇗

- Developed a smart contract using **Solidity** that enables the creation of campaigns and the donation of funds.
- Deployed contract to **Goerli** Network, uploaded Images to IPFS, and interacted with the contract using **Thirdweb**.
- Designed and Developed the Dapp using **Tailwindcss** and **Nextjs** with **TypeScript.**

OpenRiver | Front-End, Web3   Preview ⇗

- Developed this NFT Marketplace with **Nextjs** using **thirdweb** SDK & pre-built contracts and **Moralis** web3 API without any backend or Baas.
- Connect your web3 wallet, Create Collection, Mint NFT and List them for sale on OpenRiver. Art will also get listed on test network of OpenSea. User can buy a listed NFT at mentioned price.

Project-ERC20 | Full-Stack, Web3   Preview ⇗

- Web3 Application where ERC20 Token can be minted, Transfered and Burned in exchange for Secret messages.
- Developed smart contract using **OpenZeppelin** and **Solidity**. Deployed on **Goerli Testnet** using **Hardhat**.
- Designed and Developed Full Stack Dapp with **Nextjs** and **Mongoosejs** to Interact with the contract using **Etherjs**.
