SUMMARY

Full-stack product engineer with 4+ years of experience building polished web and mobile products across consumer apps, event platforms, trading tools, Web3 interfaces, dashboards, and developer utilities. Strongest at the intersection of product UI and practical systems: React, Next.js, TypeScript, React Native/Expo, realtime data, local-first storage, API design, Prisma-backed backends, and stateful workflows.

WORK EXPERIENCE

JuiceXP (formerly Juice Labs) — Full-Stack Developer

Jan 2024 - Present

- Worked across a production fan-engagement and rewards platform for live events, including quests, prizes, affiliate codes, workspace/market flows, venue show-board UX, scheduled notifications, API payloads, and redemption/refund paths.
- Contributed inside a TypeScript monorepo spanning Next.js server and dashboard apps, mobile/Capacitor surfaces, super-admin tooling, shared core/react packages, CLI utilities, API docs, and product docs.
- Improved reliability around Prisma transactions, tests, Sentry-backed observability, and AWS-integrated infrastructure.

Freelance — Full-Stack Developer

Sep 2022 - Dec 2023

- Built client products including BlockTrain, EduCompanion, and Beyond Pinks across education, mentoring, blockchain learning, and product-content workflows.
- Built BlockTrain as a full-stack blockchain education platform with courses, articles, tutorials, and project guides; reached 125k+ visitors in its first 2 months.

AppSecure Security — Front-End Developer

Jan 2022 - Aug 2022

- Designed and built the secure frontend for PentaBug, a bug bounty platform used by security researchers and organizations, using Next.js, React, and Auth0.
- Built product interfaces for vulnerability reporting, program workflows, secure embedded forms, and integration-heavy handoff flows.
- Helped onboard 200+ hackers and 5 companies in the first month after launch.

PROJECTS

Pouch - Expense Tracker

App Store

- Shipped an iOS/Android-first personal finance app with categories, groups, budgets, calendar views, insights, CSV export, onboarding, and trial/paywall flows.
- Built local-first data flows with Expo Router, React Native, TypeScript, NativeWind, SQLite + Drizzle, Reanimated/Gesture Handler, SVG charts, Zustand, and RevenueCat.

Roost

App Store

- Shipped an iOS social food-discovery app for nearby/trending restaurants, wishlists, reviews, photo uploads, profiles, and follows.
- Built location/reverse-geocoding flows, Google Places/Maps, SecureStore auth, push notifications, UploadThing uploads, Zustand state, and an Express + Prisma + PostgreSQL backend.

Algo Trading

Private project

- Built a single-tenant options execution desk for Zerodha Kite Connect with live ticks, candle sync, option-chain selection, risk-based sizing, armed entries, stop-loss, trail-to-breakeven, and square-off flows.
- Implemented frozen anchor candles, synthetic stop-limit triggers, durable active-trade state, order reconciliation, WebSocket fan-out over SSE, structured logging, Sentry, and deployment safeguards.

LockWars

- Built a fantasy sports mobile app with auth, lobbies, lineups, player cards, matchup rooms, promotions, token-shop screens, wallet flows, realtime chat, Firebase, Socket.io, Zustand, Jotai, and Prisma-backed backend state.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, Expo, TypeScript, Redux, Tailwind CSS, NativeWind, shadcn/ui, Radix UI, Framer Motion

Backend/Data: Node.js, Express, Prisma, Drizzle, PostgreSQL, SQLite, MongoDB, Firebase, REST APIs, WebSockets, SSE

Product Systems: auth, payments/subscriptions, local-first storage, realtime state, dashboards, exports, push notifications, file uploads

Web3/Trading: Solidity, Hardhat, ethers.js, thirdweb, wagmi, viem, Kite Connect, wallet flows, contract reads/writes

Tools: Git, GitHub, Vercel, Sentry, AWS, Figma

EDUCATION

B.Tech, Computer Science and Engineering

Sikkim Manipal Institute of Technology

2018 - 2022

8.28 CGPA

TSBSE

Narayana Junior College, Hyderabad

2016 - 2018

91.3%
